Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art teaches the use of a camera with solid-state image sensor and selecting circuitry for selecting an optical sensitivity setting and further teaches a system controller for controlling the camera.

Furthermore, the prior art teaches the use of image pickup apparatus that has a timing generator and allows the frequency of the horizontal transfer signal to be changed and lowered. However, the prior art does not teach the use of the timing generator lowering the frequency of the horizontal transfer signal below a usual frequency for use in transferring the signal charge in the horizontal direction in accordance with the photographic sensitivity selected. Therefore, the claims are allowed over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
